

DENTCloud™

SECURE CLOUD STORAGE AND ACCESS
YOUR ENERGY DATA WHENEVER OR WHEREVER YOU ARE

MEET THE DENTCLOUD

DENTCloud offers unparalleled accessibility to your energy data anywhere in the world. This intuitive platform gives you real-time visibility into all your power consumption data points and the flexibility to create dynamic plots and dashboards that meet your unique monitoring needs. It facilitates seamless data export, enabling effortless integration with popular programs such as Microsoft Excel for further analysis and reporting. Embrace the future of energy management with DENTCloud, where precision meets convenience for a transformative monitoring experience.

WORK WITH YOUR DATA, YOUR WAY

Easy access to data is becoming more important for business leaders. Whether it's managing subtenant billing, performing M&V, or applying for certifications, having the ability to quickly and efficiently access your power data is paramount for success. With DENTCloud, you can access your data whenever or wherever you are. Create customized dashboards with just the information you need to quickly check in on your energy use. Export all (or subsets) of your data for easy analysis or visualization. Maintain and access historical building data securely with DENTCloud.

FLEXIBLE AND EASY TO USE

With complete integration with the DENT PowerScout 48 HD, setting up is as simple as connecting the meter to the internet and then adding the meter to your cloud account. DENTCloud allows direct data visualization through customizable widgets and dashboards. Real-time views of data points, graphs, and trends can be easily created to give you the insights that are important to you.

APPLICATIONS

- Tenant submetering and billing
- Compliance and Certifications
- Realtime monitoring of energy and carbon goals
- Measurement & Verification projects

FEATURES

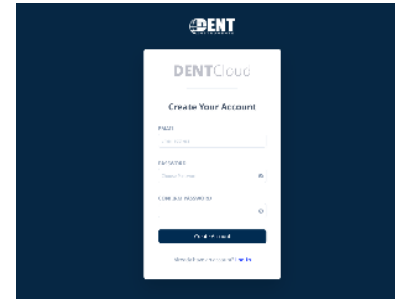

- Cloud Security is ISO 27001 certified with HIPAA, PCI DSS, FedRAMP, FISMA, and GDPR compliance
- Dynamic and scalable database
- Perpetual and limitless historical data storage
- Real-time access to voltage, current, power, energy, and many other electrical parameters
- Revenue grade (ANSI C12.20-2019 Class 0.5) energy data for subtenant billing applications
- Customizable data visualization
- No downloads - Accessible from any web browser
- Manage multiple meters in a single account
- Share meter data between multiple accounts
- Replaces the need for a on-premise building management system to poll the meter

DENTCloudTM START TO FINISH

EASY SETUP FOR QUICK DATA ACCESS

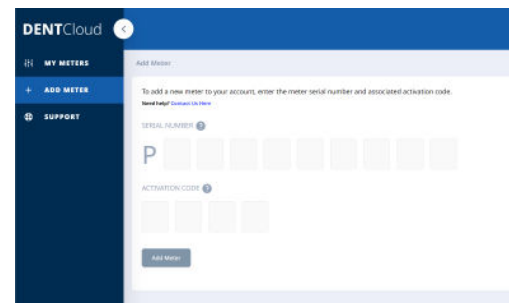

1 CREATE YOUR CLOUD ACCOUNT

Go to <https://dentcloud.io> and create an account with just an email address and password.

2 ADD A METER TO YOUR ACCOUNT

Use the serial number and unique activation code from the meter, to "adopt" the meter into your account.

3 ACCESS YOUR METER'S LIVE AND HISTORICAL DATA

Create a customized dashboard for viewing parameters and graphs of your data, work with the data in a tabular form, or export for use in your favorite data analysis program.
